Art Unit: 2829

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, 20 and 21 are, drawn to apparatus for generating and storing metering information, classified in class 324, subclass 142.
 - II. Claims 12-19, drawn to a method of storing metering information, classified in class 324, subclass 142.
2. The inventions are distinct, each from the other because:
3. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case practice of the method requires structure not claimed in any of the independent apparatus claims and therefor the obvious method of use of the apparatus of those claims is different than that of at least claim 12.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2829

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
